Subject: FW: Your thoughts on surface water, groundwater and sediment expertise

Tom –

I got this inquiry from Region 8 / unified command. I have not acted on it yet. Is this activity that they want to start the same general activity, watershed monitoring/management, that you were discussing at the 10 am meeting this morning?

Subject: Your thoughts on surface water, groundwater and sediment expertise

Hi Greg,

I am now working as the Liaison Officer in Area Command in Durango and there have been conversations today about the need to start thinking of putting together a long term monitoring strategy for the watersheds potentially impacted by the Gold King Mine release. We are thinking that we would need to pull together a team of expertise in surface water, drinking water, groundwater and sediments and I wanted to informally reach out to you to see if you had any thoughts on specific names. I think it may take a couple of months for a team to develop this strategy. I was also wondering if OW could assist.

Thanks in advance for any thoughts you may have with this and I am also happy to give you a call to discuss in more detail.

Patti
